Machine Learning, UX/UI Design, Graphic Design, Product Design, Branding, Music production.

Languages

English – Pre-Intermediate, →
on the way to Intermediate

Projects

♦ **React Movie Library** [01.2020]

A modern movie application written with React/Redux. The app features: Async Requests, Custom Redux Middleware, Action Cancellation, Lazy Loading, Client-Side Storage.

React

Redux

Material UI

REST API

CSS-in-JS

Lazy Loading

♦ **PracticeChat** [private repository, not released yet]

Online chat for learning English. A real-world full-stack project with REST API, WebSockets and JWT-authentication. The front-end part is written by using React Hooks, Redux and Redux Middlewares.

React

Redux

Node.js

Express.js

MongoDB

Socket.IO

SASS

Webpack

♦ **Sticksy.js** [2019 – present]

Open-Source library for making a “sticky widget” behavior. Here you can see my algorithmic and programming skills in vanilla JavaScript.

♦ **FontNinja** [2017 – 2018]

Font-organizer for Adobe After Effects with search, filter, sorting, tagging system, real-time preview, virtual-scrolling, and many other features. Used Inversion of Control to build for different environments.

TypeScript

Vue

Vuex

Inversify.js

SASS

Adobe CEP

Webpack
